TEXTURE GLASS

TEXTURED GLASS can distort images by refracting or bending light in different directions, resulting in a blurry or distorted image. The degree of distortion can vary based on the type and amount of texture applied to the glass as well as the angle of light entering the glass.

Glass partition is commonly used in modern office spaces, conference rooms, and residential areas to create a sleek and contemporary look while allowing natural light to flow through.

Despite the potential for distortion, textured glass is often used in design for increased privacy, enhanced aesthetics, and improved energy efficiency. Some types of textured glass, such as patterned glass, can create unique visual effects that add to the overall design of a space. Careful consideration of the degree of distortion and overall design goals is important when selecting textured glass for a project.

FABRIC LAMINATED GLASS

FABRIC are meticulously cleaned, carded, and spun into yarns, which form the foundation of the fabric. This crucial stage lays the groundwork for the subsequent weaving or knitting processes, which ultimately result in the creation of the final product.

<https://www.glasslabel.com.hk/partition>

Fabric

GLLG-3109

FABRIC PRODUCTION involves the intricate process of weaving or knitting fibers together to form a structured textile. The initial step in this process is the selection of fibers, which can be either natural, such as cotton, wool, silk, or linen, or synthetic, such as polyester, nylon, or rayon. Once the fibers have been chosen.

Beige is a neutral color that is often used in interior design to create a calm and comfortable atmosphere. Beige is a versatile color that pairs well with a wide range of other colors, textures, and styles, making it a popular choice for walls, furniture, and textiles in both residential and commercial spaces.

GRADIENT GLASS

THE COLORED GLASS is precisely matched to Pantone standards, resulting in significant advantages in terms of color consistency and accuracy. By adhering to these industry standards, manufacturers can ensure that the glass products they produce have a uniform and consistent color across all batches and installations.

<https://www.glasslabel.com.hk/partition>

GLTG - 2135

This level of precision and consistency is essential in meeting the expectations of designers, architects, and consumers alike, and in providing an optimal aesthetic experience. The use of Pantone standards for colored glass production is a testament to the industry's commitment to quality and consistency in design.

PATTERN GLASS

Custom-made glass patterns are a popular choice in interior design due to their versatility and uniqueness. By creating custom patterns, designers can achieve a distinctive look that perfectly matches the style and color scheme of the space.

<https://www.glasslabel.com.hk/laminatedglass>

07

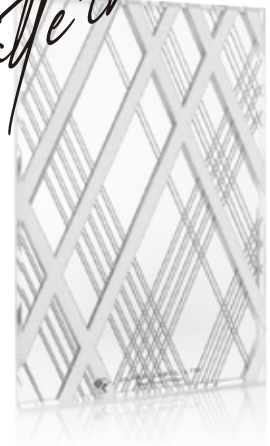

This allows for intricate designs and detailed imagery to be incorporated into the glass. Additionally, overall, custom-made glass patterns offer a high degree of customization and can add a touch of elegance and sophistication to any interior space.

Pattern

GLGP - 2063

THE PATTERN GLASS is engraved a decorative design onto its surface, creating a frosted or matte effect that diffuses light and adds privacy while still allowing light to pass through, making it ideal for use in doors, windows, and partitions.

K 11

Ceiling Glass

TEXTURED GLASS

TEXTURED GLASS is a type of decorative glass that features a pattern or texture on its surface. This type of glass can add privacy, diffuse light, and create a unique visual effect in an interior space.

<https://www.glasslabel.com.hk/retail>

08

GLTG-1103

CEILING MIRRORS are a versatile design feature that can serve both practical and decorative purposes. By reflecting light and creating a sense of spaciousness, ceiling mirrors can brighten and visually enhance a room.

They can also be used to add a unique and visually striking element to a space, whether in a modern or traditional design. This makes ceiling mirrors a popular choice for both residential and commercial settings. The many benefits of ceiling mirrors, including their ability to improve lighting and create a sense of openness, make them an ideal design element for enhancing the functionality and aesthetics of any space.

3-LAYER
LAMINATED GLASS

TEXTURED GLASS flooring is a unique and visually striking flooring option that provides a non-slip surface, helping to prevent slips and falls.

<https://www.glasslabel.com.hk/partition>

The texture on the surface of the glass creates friction, making it a practical solution for commercial and residential spaces. Its ability to add a decorative element to a space makes it a popular choice for designers looking to create a visually interesting and safe environment. Overall, textured glass flooring is a functional and stylish choice for modern interior design.

GLTG-1180

Textured glass features a wavy surface pattern, creating a distorted and blurred effect when viewed through it.

LA MAISON VALMONT

Crystal for Partition

TEXTURE GLASS

Crystal and glass are both materials used in interior design that offer different benefits. Crystal has superior clarity, brilliance, and durability due to its higher lead concentration, making it ideal for decorative items.

<https://www.glasslabel.com.hk/furniture>

Crystal

GLCT-1007

Glass is more versatile and affordable, suitable for a wide range of applications. Ultimately, the choice between crystal and glass depends on the specific needs and aesthetic requirements of the project. Both materials offer unique characteristics that can enhance the functionality and aesthetic appeal of any space.
